DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group 3 (claims 16-19) in the reply filed on 03/02/09 is acknowledged.

Claims 12-15 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 03/02/09.

Drawings

2. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, "the adjustable deformable resilient member being an inflatable member that is inflated with liquid or gas" as cited in claim 19 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3771

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 18 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 18 contradicts claim 16; claim 18 recites the adjustable resilient member is rotatably mounted on forehead rest, while claim 16 recites the adjustable resilient member is included in the forehead rest.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 16-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Farris (5220699).

Regarding claim 16, figures 2 and 5 of Farris show a device comprising:

a patient interface (10), in use in fluid communication with supply of gases (20),
a forehead rest (16, 26),engaging interface including a user-adjustable
deformable resilient member configured to in use rest against the face of a patient.

Regarding claim 17, Farris disclose the adjustable deformable resilient member
being at least one adjustable strap (see elastic strap 26 in column 5, lines 17-21)
attached and adjustable on forehead rest.

Regarding claim 18, Farris discloses the adjustable deformable resilient member
being a member rotatably mounted on forehead rest (since the strap (26) is elastic, the
member (16) can be rotated relative to the elastic strap).

Regarding claim 19, Farris discloses the adjustable deformable resilient member
being an inflatable member (16) that is inflated with gas (see column 4, lines 33-45).

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to
applicant's disclosure. Kopacko et al. (6467483) discloses a mask with a gel forehead
cushion for support. Jones, Jr. et al. (7219670) and Ho et al. (6805117) discloses a
mask with a user-adjustable strap for forehead support. Palzaaotto et al. (7234462)
discloses a mask with a elastic strap for attachment to the face.
